I am passionate about embarking on a career as a **MERN Stack Developer**. While I may be new to the industry, I bring a strong foundation in programming fundamentals and a deep enthusiasm for learning and growing in the field of web development.

Driven MERN Stack Developer with a solid grasp of programming basics and a fervent commitment to mastering web technologies. Eager to contribute a quick-learning attitude and adaptability to your dynamic team, while growing expertise in React.js, Node.js, and MongoDB through hands-on projects and collaboration.

Technical Skills:

Frontend Development: Proficient in HTML, CSS, and JavaScript, with a keen interest in mastering React.js for building dynamic and interactive user interfaces.

Backend Development: Basic understanding of Node.js and Express.js, eager to delve deeper into backend development to build robust server-side applications and RESTful APIs.

Database Management: Familiarity with NoSQL databases such as MongoDB, excited to learn more about database modeling, querying, and management.

Projects:

- Project 1: Developed a responsive portfolio website using React Js, showcasing my skills and projects to potential employers and clients.
- Project 2: Created a simple CRUD (Create, Read, Update, Delete) application using React.js and JSON-server, demonstrating my ability to build frontend components and manage data.

Personal Traits:

- **Quick Learner:** I have a strong desire to learn and grow in the field of web development and am committed to continuously expanding my skillset.
